

**DIGI *SPORTING***

**A new step towards digital transformation through sports science**

## **Our first steps: Analysing the state-of-the-art**

After kicking off in Autumn 2019, in Summer 2020 the [Digi-Sporting project](#) completed the first of its phases with very interesting results, providing a vast amount of useful information by reviewing the state of the art on technologies in sports clubs and entities & developing a field study with a survey conducted with over 400 specialists in sports clubs and academies.

All this information was captured in a comprehensive book published in open access, where it is presented in detail.

**DOWNLOAD IT HERE!**

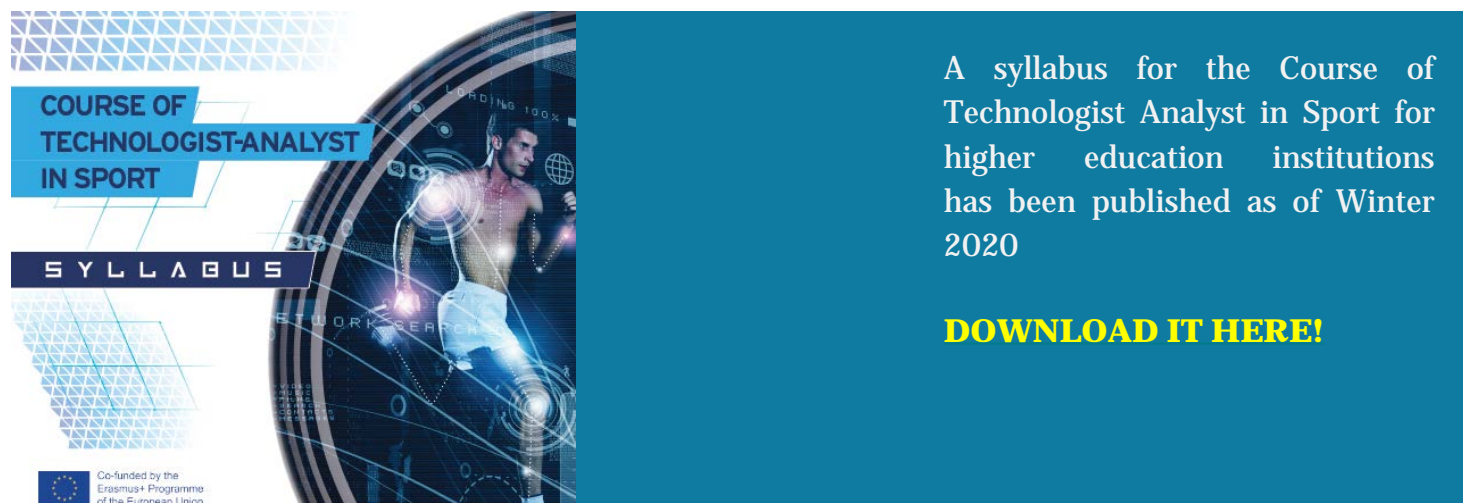

In addition, shortened versions were published in the 6 different languages of the project: you can download them in [English](#), [Spanish](#), [German](#), [Greek](#), [Italian](#) and [Portuguese](#).

## **Developing a postgraduate training curriculum for the technologist-analyst in the field of sports science**

## profile (I02)

The objective of this second phase was to design a study plan for the completion of a short-term online postgraduate course, which may be a draft of a master's degree, allowing a specialization of technologist-analyst in sport graduates in sport sciences with any specialization or area of work. It could also be suitable for people with higher training or not, that work effectively in the sports environment.

COURSE OF  
TECHNOLOGIST-ANALYST  
IN SPORT

SYLLABUS

Co-funded by the  
Erasmus+ Programme  
of the European Union

A syllabus for the Course of Technologist Analyst in Sport for higher education institutions has been published as of Winter 2020

**DOWNLOAD IT HERE!**

Furthermore, a pilot training course has been developed online -[through the Digi-Sporting Campus](#)- between mid-February and the end of March in order to test all our work. All in all, 45 students decided to join the course.

## What's next?

### A questionnaire for the online self-assessment tool

A self-diagnostic interactive tool to define sports organizations specific needs has been elaborated during the last two months. Once it is definitely published, all partners will carry out a dissemination campaign in order to collect as many responses as possible from sports clubs, and will be used in a guide about potential tools for covering possible technological shortcomings in the area.

## What is DIGI-SPORTING about?

It is a fact that does not require further explanation that digital transformation is affecting quickly and deeply all areas of society and economy and, in this sense, the worlds of education and sports are not apart of this reality.

**Currently, there is a wide range of technologies and equipment aimed at improving and optimizing the development of sports activities and training, both in high competition**

(professional level) and in grassroots sports. However, **the way in which sport academies and clubs apply these advances at the European level is very varied and erratic.**

Therefore, Digi-Sporting is a strategic partnership, with a marked educational character, designed to **support sports organizations that want to give further steps towards digital transformation, by providing them with a new specialized and cross-cutting professional profile that currently does not exist at a European level, as well as giving them keys and guidelines to implement a change in the management model through the use of new technologies.**
