

**DIGI *SPORTING***

**A new step towards digital transformation through sports science**

## **Self assessment evaluation tool**

The Digi-Sporting Project completes its third phase, with the publication of the online self-assessment evaluation tool so that any sports club can self-assess its level of technological development and digital transformation.

## **What's next? Digi-Sporting Quality Seal**

It is the last step of the project, which unifies and brings together all the information and training elements created during the project. The online self-assessment evaluation tool incorporates the Digi-Sporting Quality Seal. When a club carries out the self-assessment, it will receive a certificate with the seal of quality at 4 possible levels, depending on its level of digital transformation and technological development. In addition, once the certificate has been obtained, you will have access to a training portal, which will include a several contents and manuals derived from the previous phases of the project. This portal will continue to be updated once the project is finished, thus ensuring its sustainability and long-term life. The incorporation of the seal of quality will be accompanied by the Manual of Digital Transformation Standard, that explaining the use of the self-assessment evaluation tool and how to obtain the seal.

## What is DIGI-SPORTING about?

It is a fact that does not require further explanation that digital transformation is affecting quickly and deeply all areas of society and economy and, in this sense, the worlds of education and sports are not apart of this reality.

Currently, there is a wide range of technologies and equipment aimed at improving and optimizing the development of sports activities and training, both in high competition (professional level) and in grassroots sports. However, the way in which sport academies and clubs apply these advances at the European level is very varied and erratic.

Therefore, Digi-Sporting is a strategic partnership, with a marked educational character, designed to support sports organizations that want to give further steps towards digital transformation, by providing them with a new specialized and cross-cutting professional profile that currently does not exist at a European level, as well as giving them keys and guidelines to implement a change in the management model through the use of new technologies.

## UPDATES OF THE PROJECT

Co-funded by the  
Erasmus+ Programme  
of the European Union

This project has received funding from the European Union's Erasmus+ programme under the registration number 2019-1-ES01-KA203-065505. This newsletter reflects only the author's view and the Commission is not responsible for any use that may be made of the information it contains.
